

# TUTHILL CENTIPEDE CIDER APPLE HARVESTER

- Fast** - it will pick over 100 tonnes of fruit per day
- Straight forward** - two cleaner belts and a fan give you factory-ready fruit
- Compact** - your trailer is towed from your tractor's automatic hitch

A complete one-pass harvesting system

Filling a four tonne trailer with cleaned fruit

**The new Tuthill Centipede Harvester can be used with a Tuthill Centipede Side Sweep and Tuthill Front Brushes to provide a one pass harvesting system that can cover over one and a half acres per hour. No need for extra passes down your orchard row and no need to blow fruit. The Tuthill Centipede range of products are compact, efficient and economical to buy and operate.**

# THE COMPLETE TUTHILL CENTIPEDE HARVESTING SYSTEM

## Tuthill Centipede Harvester

- picks fruit in rows up to six metres wide. It cleans the fruit and delivers it into trailers up to two metres high.

The delivery elevator can be lowered for transport

## Tuthill Centipede Front Brushes

- clear fruit from the tractor's path. They are compact and efficient.

They fold hydraulically for easy turning on headlands.

**Tuthill Centipede Side Sweep** clears fruit from between the trees. They work equally well on herbicide strips or grass. They can be positioned to work in row widths from four metres to six metres. No need to blow fruit.

**Above:** The Tuthill Centipede Harvester and Tuthill Side Sweep work well together to pick the heaviest crops cleanly and gently.

**Above Left:** The Tuthill Centipede Harvester fits between the tractor and the trailer. It is so compact that the trailer is towed from the tractor's own automatic hitch system. This means excellent traction and good weight distribution.

**Left:** A four tonne load of clean apples.

## Technical Specifications: Centipede Harvesting System

**Centipede Harvester capacity:** 15 tonnes per hour

**Row width:** From 5.5 metres to 6 metres - other widths available

**Height by tree trunk:** 500mm
